

DISASSEMBLY MACHINE

In addition to reusable spare parts, machines can also be a source of raw materials, plastics, glass and other valuable materials such as steel, aluminum, copper, etc. Quick and accurate disassembly of parts and materials significantly increases profitability.

Advantages

Dismantling the machine

- Machine warehouse
- Drain all fluids and oils
- Collect reusable parts
- Dismantle the car
- Dismantle the engine (if not recyclable)
- Compression, crushing, cutting off.

Why need to do dismantle

- In addition to reusable parts, machines can also be a source of raw materials, plastic, glass and other valuable materials such as steel, aluminum, copper, etc.
- Fast and accurate dismantling of parts and materials significantly increases profitability.

Safety

- Safe cab for the operator. The cab protects the operator from high temperatures, fire, explosion, etc.

High efficiency

- Manual: work for 2 people, dismantle 1 machine per day
- With the help of a dismantler: work for 1 person, dismantle 25 ~ 30 cars per day.
