DOOSAN HEAVY EXCAVATOR ATTACHMENTS

Doosan's portfolio of Attachments are designed to work in all types of working applications. The new range of DOOSAN attachments which are offered, are developed based on customer's requirements and satisfaction criteria through worldwide market feedback. The attachments series consists of demolition, material handling, earth moving and connecting attachments.

HYDRAULIC BREAKER

ROTATING CRUSHER

FIXED PULVERIZER

HYDRAULIC QUICK COUPLER

RIPPER

MULTI-PROCESSOR

STEEL SHEAR

MULTI-GRAPPLE

STONE GRAPPLE

DOOSAN HEAVY EXCAVATOR ATTACHMENTS USING THE 6 KINDS OF GOOD REASONS

ONE-STOP SHOP

One place for complete solutions :
(carrier + attachments + parts + service)

ENGINEERING APPROVED

Optimized for DOOSAN equipment high efficiency and performance, resulting in lower running and maintenance cost.

SERVICE

Broad coverage via the DOOSAN service network, fully supported by DOOSAN product specialists.

QUALITY

Products manufactured to highest standards.

WARRANTY

Avoid compatibility issues and operating differences from using Non-approved attachments.

PLUG & PLAY READINESS

Easy to install and operate.

- ✓ Quality

Product

Reinforced dampeners

- Vibration dampening prevents carrier damage and improves operator comfort.
- Minimizing recoil shock induced by impact.
- Low noise for city construction.

Stronger through bolt

- Further improved tensile strength by innovative shape and machining process.

Completed box enclosure

- No rigid side bolts.
- Minimized maintenance cost.
- Extremely durable welded structure.
- Completely protected Hammer and Less noise.
- Wear and dust protection.

Model		DXB10	DXB20	DXB35	DXB45	DXB90	DXB170	
Carrier weight	t	1~2.5	2.5~4.5	4~6	6~8	12~16	18~28

	Low Speed	J						
Automatic grease option		-	-	-	-	-	●	
Two-speed control		-	-	-	-	-	-	

Unique valve design

- Low pressure fluctuation.
- Special design protecting carrier's pump.

Long piston : optimal energy transmission

- Transmission
- Maximized productivity.
- Minimized recoil.
- Eliminates mechanical springs.
- Special heat-treated and hardened piston.

Hardened rock dragger

- Resisting wear and abrasion.

Feature & Benefits

Concrete proven working Principle (Oil and gas assist)

- Pressurized Nitrogen gas is the main power source, to operate with less demand on the carrier's hydraulic system.

Anti-blank blow system

- Significantly reduces blank blow induced failures.

Dual Speed Control

- Adjust blow frequency according to rock hardness.

Competitive component counts

- One-third the component counts of competitors.
- Easy installation and maintenance.
- Help inventory management.

Heavy duty main bracket design

- Bear external force with better resilience.
- Long lasting body structure reduced sound.

Maximized life time of dampers and wear plates

- Use new type of composite 2 layered damper and wear plate.

Centralized Lubricating System (option)

- Enable to utilize centralized auto grease system.

Demolition Attachments

FIXED PULVERIZER

Doosan Fixed Pulverizers are designed for both primary demolition work and secondary concrete reduction. For secondary demolition, it is ideal for breaking out concrete from fixed structure, pulverizing concrete, separating different materials for recycling, and cutting reinforced rods and small steel profile.

Product

Pulverizing tooth
On the outer end of jaw for high productivity during pulverizing job.

Tooth bolting style
For quick and effective replacement. (welded type is also available)

Adjustable Speed control valve
Delivering maintenance efficiency.

Reversible rectangular blades
For lower maintenance cost.

Hardened teeth
High spec. materials for enhanced durability.

Trunnion type cylinder
For maximum break out force throughout jaw closing motion as opening motion from FP22 and bigger.

Feature & Benefits

4 different models

- 13-36 tons Models are available.

Trunnion-supported type cylinder

- Offers high breaking forces throughout the entire working cycle as well as stable movement.

Adjustable Speed control valve with cylinder

- Maximum maintenance efficiency and working speed.

Customized Blades and Tooth System

- Optimized tooth arrangement.
- Fully replaceable rectangular blades and bolting tooth.

High grade material composition for better durability

- Used HB360-600 grade material on replaceable parts.

Model		FP14	FP22	FP25	FP34

Demolition Attachments

ROTATING CRUSHER

Product

Reversible rectangular blades

Hardened teeth
High spec. materials for enhanced durability.

Increased jaw opening
To crush large sections.

Hydraulic 360° rotation unit
Allowing fast and targeted positioning to materials.

Adjustable Speed control valve
Delivering maintenance efficiency.

Trunnion type cylinder
The entire operation from RC25 and bigger.

Doosan Rotating Crushers are designed for both primary demolition work and secondary concrete reduction. Especially for secondary demolition, it is ideal for breaking out concrete from fixed structure, pulverizing concrete, separating different materials for recycling, cutting reinforced rods and small steel profile, and working with high reach boom.

Feature & Benefits

4 different models

- 13-36 tons Models are available.

Trunnion-supported type cylinder

- Offers high breaking forces throughout the entire working cycle as well as stable movement.

Hydraulic 360° rotation unit

- Limitless rotation for fast and targeted positioning in all conditions.

Adjustable Speed control valve with cylinder

- Maximum maintenance efficiency and working speed.

Customized Blades and Tooth System

- Optimized tooth arrangement.
- Fully replaceable rectangular blades and bolting tooth.

Wider opening jaw

- Easily operates for a large demolition job.

High grade material composition for better durability

- Used HB360-600 grade material on replaceable parts.

Model		RC14	RC22	RC25	RC34

Demolition Attachments

MULTI-PROCESSOR

Doosan Multi-Processors are designed for all demolition sites by inter-changing jaw sets mounted on a single base unit.

- Crushing Jaw set
- Pulverizing Jaw set
- Demolition Jaw set
- Shear Jaw set

Product

Speed control valve
High jaw opening & closing speed.

One pin type jaw mechanism
For enhanced shearing force and working & maintenance efficiency.

Customized tooth type
Welded type or replaceable type available.

Unlimited 360° Hydraulic rotation
With heavy-duty swing gear.

Reversible rectangular blades
For lower maintenance cost.
User friendly blade clearance
Adjustment by using one set of adjust nut.

Feature & Benefits

2 different models

- 20-36 tons models are available.

Unlimited 360° Hydraulic rotation

- Limitless rotation for fast and targeted positioning in all conditions.

Integrated Speed up valve with cylinder

- Maximum maintenance efficiency and working speed.

Customized Blades and Tooth System

- Fully replaceable rectangular blades and bolting tooth.
- User friendly blade clearance.

One pin type jaw mechanism

- Enhanced Crushing and shearing force.

High grade material composition for better durability

- Used HB360-600 grade material on replaceable parts.

Various jaw options

- Suitable for all kinds of job application at maximum versatility.

Demolition Attachments

STEEL SHEAR

Product

Top cover
Makes cylinder and speed control valve maintenance easier.

Guide slide & puck system
Reduces jaw stress and helps to eliminate jamming.

A Large diameter rotating bearing
Utilizes 2 rows of ball bearings giving maximum durability.

Main Blade
It is reversible.
Bolt-on HARDOX400 Material.

Offset jaw
Apex for optimum shear power.

Doosan Steel Shears are designed for cutting general and heavy duty steels such as section bars, pipes, and steel structures.

Feature & Benefits

2 different models

- 18-50 tons models are available.

Unlimited 360° Hydraulic rotation

- Limitless rotation for fast and targeted positioning in all conditions.
- A large diameter rotation bearing utilizes 2 rows of ball bearings giving maximum durability.

Customized design for easy maintenance

- Top cover for speed control valve and cylinder.
- Blade clearance adjuster for keeping the performance optimally.

Excellent jaw section

- Use of HARDOX400 material makes it durable.
- Interchangeable main blade and Bolt-on special material wearing tip.

Guide slide and puck system

- Reduces Jaw stress.
- Helps to eliminate jamming.

A large bore hydraulic cylinder

- Provides superior cutting force and cycle time.

Model			SS34	SS48

Material Handling Attachments

MULTI-GRAPPLE

Doosan Multi-Grapples are designed for selective demolition, sorting of recyclable material and loading of various materials.

Product

Double motor system
Stable operation and motor protection.

Stopper
Is located on the body and reduces the cylinder when grapples are opened.

Bottom plate of body change
Protects against foreign particles penetrating body by using HARDOX360HBN.

Reinforced jaw
Using HARDOX400HBN.

Feature & Benefits

5 different models

- 4-38 tons models are available.

Unlimited 360° Hydraulic rotation

- Limitless rotation for fast and targeted positioning in all conditions.

Customized design for easy maintenance and repairing reinforced jaw used

- Use of HARDOX400 material makes it durable.
- Bolt-on blade.

Strong pin stopper

- 4 Stoppers applied for cylinder protection.

Customized design for stable operation

- 2 cylinders applied. (MG14 and larger)
- Double motor system.

Material Handling Attachments

STONE GRAPPLE

Product

Doosan Stone grapple is designed for transporting or loading stone, scarp, garbage, demolition debris and waste paper in forestry, recycling, landscaping and general construction sites.

Feature & Benefits

10 different models

- 5-45tons models are available.

Unlimited 360° Hydraulic rotation

- Limitless rotation for fast and targeted positioning in all conditions.

Oil flow control valve

Enclosed cylinder check valve for safety

- Prevent to drop of holding material.

Large hydraulic cylinder and swing bearing

- Provide superior grasping force.
- Enhanced durability.

High grade material composition for better durability

- Used wear resistant special solid steel (API70 & AR500 from POSCO)

Motor protection mechanism applied.

	Required oil flow	lpm	30~50		30~50		40~60	

Feature & Benefits

Link type

Optimized jaw shape for holding small object

Link type (optional)

8 Different models

- 5-34tons models are available.

Unlimited 360° Hydraulic rotation

- Limitless rotation for fast and targeted positioning in all conditions.

Oil flow control valve

Enclosed cylinder check valve for safety

- Prevent to drop of holding material.

Wider opening and narrow closing jaw

- Easily operates for grapping a small single log.

Large hydraulic cylinder and swing bearing

- Provide superior grapping force.
- Enhanced durability.

High grade material composition for better durability

- Used wear resistant special solid steel

Motor protection mechanism applied.

Jaw and linkage option for job application

- Link type (STD.) / Pendulum type.

Material Handling Attachments

ORANGE GRAPPLE

Doosan Orange grapples are designed for handling scrap iron and waste.

Product

Tine

High strength abrasion resistant steel for long life.

Protectors

All hydraulic parts specially protected.

Tooth point

Replaceable tine tips.

Relief valve

Adjustable maximum closing force to protect structure and cylinders.

Feature & Benefits

6 different models

· 14-52 tons Models are available.

Uses High strength and abrasion resistant steel

Highly qualified hydraulic parts for stability

Simple structure for ease of maintenance

Optimized tine shape for high efficiency

Various options for customer satisfaction

- Tooth Point : Exchangeable Tooth / Welded on tooth made of HARDOX500
- Tine type : Fully Closed / Half Closed / Opened
- Numbers of Tines : 5

CLAMSHELL BUCKET

Doosan Clamshell buckets are designed for handling industrial waste, rock, sand, grain, or cereal.

Product

Optional Rotating system
Manual Rotation.
Hydraulic Rotation.

Stable Relief Valve
Adjustable maximum closing force to protect structure and cylinders.

Oversized Pins with bronze bushings
Increases durability for long life.

Synchronous Link System
For synchronizing bucket's moving.

Feature & Benefits

8 different models

- 14-52 tons Models are available.

Great performance with two vertical cylinders

Uses HARDOX400BHN on wear parts

Highly qualified hydraulic parts for stability

Various options for customer satisfaction

- Rotating system : Hydraulic Rotation / Manual rotation

- Bucket type : Sand bucket without tooth  General Purpose bucket with tooth

PLATE COMPACTOR

Product

Oil bath type

Compaction weight chamber is filled with gear oil, thus, it eliminates periodical greasing & oil changing interval is reduced.

Durable frame design

Durability of main body is increased by flat and solid frame.

Stopper

Limits excessive pressing force from excavator.

Wider cushion rubber for PC05

Increases the durability of cushion rubber.

Doosan Plate Compactors are designed for soil compaction in trenches, foundations, or slope applications. Its heavy-duty design offers a variety of application such as piling, compacting and etc..

Feature & Benefits

5 different models

- 4-40 tons models are available.

Oil bath type

- Compaction weight chamber is filled with gear oil.
- Periodical greasing & oil changing interval is 1 year.

Heavy duty gear motor

- Prevents damage caused by pressure shock during start-up and shut-down.

Cushion rubber

- Protect machine and operator from vibrations.

Single hose block

- All hoses are routed within the frame and connected to a mono hose block.
- Keeps the hoses from damage.

Self-aligning bearing

- Provides a long service life to rotating components.

Customized design for easy maintenance

- All grease fitting are located for easy access.

Connecting Attachments HYDRAULIC QUICK COUPLER

Product

Doosan Hydraulic Quick Couplers allow you to increase the versatility of your excavators. DXQs will help you gain in productivity and efficiency with increased safety.

Feature & Benefits

7 different models

- 5-52 tons Models are available.

Convenience

- Helps to change various attachment easily.

Robust design

- An enhanced welding structure, reducing torsion stress and increasing coupler lifetime.

Bucket reversibility

- When such reverse shoveling is required.

A lifting hook with safety clip

- For lifting and carrying materials.

Manual safety pin

- Prevents unsafe release of attachments.

Ease of maintenance

RIPPER

Doosan Rippers offer powerful ripping capabilities in hard and compact materials such as compact soil, rock, ice, caliche, tarmac, paved areas.

Product

Suitable design
Best fit for Quick-Coupler or Pin On mounting.

Extra thick steel shank
Increases the strength of the ripper.

High wear resistance with high quality steel for longer lifetime

GET replaceable wear items
Easily replaced with horizontal pin lock system.

Feature & Benefits

7 different models

· 5~52 tons Models are available.

Proven and durable design

· Reduces torsion stress.
· Perfect penetration angle.

Extra thick steel shank

· Increases the strength of the ripper, while reducing the stress on the excavator.

High wear resistance steel

· Keeps longer lifetime.

Easy maintenance

· GET wear items easily replaced with horizontal pin lock system.
